

Tutorial 0: Installing the package from the provided zip or tar.gz files

In a R console

```
setwd("Directory/where/the/packageFiles/are/found")  
install.packages("otu2ot_1.4.tar.gz", repos = NULL, type = "source")
```

or using the package.zip version

```
install.packages("otu2ot_1.4.zip", repos = NULL)
```

```
package 'otu2ot' successfully unpacked and MD5 sums checked
```

#load the package

```
library(otu2ot)
```

#get some help on the functions and datasets.

```
help(package = otu2ot)
```
